Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-50 and 62-72, drawn to a surgical device with closable jaws, classified in class 606, subclass 051.
- II. Claims 51-54, drawn to a surgical device with a light indicator, classified in class 606, subclass 034.
- III. Claims 55-61, drawn to a surgical device with fluid flow, classified in class 604, subclass 030.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, Invention II has separate utility such as for use with an electrosurgical catheter system, and Invention III has separate utility such as for use in a catheter irrigation system. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 3739

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
